

## VENDOR INDEPENDENT SOLUTION TO MAXIMIZE YOUR FLEET FLEXIBILITY

PrinterCare is our platform that allows you to monitor your fleet in the most professional way. Either cloud based or a client server solution to maximize

### Functionality

#### Manage Consumables

- Overview of toner & other consumables
- Pro active report toner status
- Support supply chain integration for easy ordering

#### Manage Service Calls

- Warning on relevant topics such as paper jam / field service needed / maintenance required etc.
- Direct reporting of critical issues to supplier or central interface
- Integration with ticketing system

#### Manage Information

- Automatic meter readings for billing
- Detailed information on volume and usage
- B&W / Colour / A3 & A4
- Asset Management
- Detailed Costs Analysis

### How does it work?

We install a small application in your network, which is collecting all the relevant information from your devices. Via a secured connection or Email this data is either sent to a local printerCare server or our printerCare cloud environment. Obviously security is a key element and this solution is designed to secure this, so we use the highest standards (128 Kb Encryption).

See also our **Printeraudit** tool, which allows you to analyze and optimize your fleet in a very easy way
